Request for Proposals

Civil Engineering Consulting Services

The Mackenzie Valley Environmental Impact Review Board (Review Board) conducts environmental impact assessments in the Mackenzie Valley in the Northwest Territories. Technical specialists and advisors are sometimes required during the assessment process to provide the Review Board with assistance in assessing potential risks and effects to and from the environment.

This document is a request for proposals for civil engineering expertise. In particular, the Review Board is looking for expertise related to roads and other linear developments in northern conditions. Experience should include:

- geological and geotechnical engineering
- construction in mountainous terrain
- construction engineering
- construction over permafrost
- assessment of potential failure modes and risks, including consideration of geo-hazards
- hydraulic engineering
- highway design

Should you wish to be considered, please submit a statement of qualifications. This should include:

1. a description of the services that can be provided
2. specific areas of expertise and associated personnel CVs
3. a rate sheet

The Review Board may request further details if needed. Your information will remain active for two fiscal years. Submissions will be accepted until **Thursday April 2nd, 2015**.
