Subject: DIAND response to Review Board IR

The following is DIAND's response to the Review Board's IRs dated February 16, 2001. We are requesting that DIAND provide the "Rehabilitation Site Restoration Model for Prairie Creek Mine" and DIAND's comments regarding its efficacy

Attention: Louie Azzolini:

RE: Information request - Information Request: Canadian Zinc Corporation

This refers to the MVEIRB information request (IR), dated February 16, 2001, on submissions made by the Nahanni National Park Reserve and the Canadian Parks and Wilderness Society.

On the subject "Canadian Zinc proposed Cat Camp/Fuel Cache Retrieval and Clean-up" please note the following:

1) A site visit by our Fort Simpson District inspectors is being planned for March 2/01. During the inspection, an assessment of the current state of the fuel tanks will be made. The inspection may show whether or not the tanks are losing fuel. A copy of the inspection report will be provided to the MVEIRB as soon as possible.

2) With respect to the Agra Earth and Environmental 1993 report, please note that we do not have a copy of the report on our files. A copy of the report may be obtained directly from Agra or CZN in Vancouver.

3) With respect to the fuel measurement records, our understanding is that CZN visited the site in the fall of 1999. A copy of the report may be obtained directly from CZN.

On the subject "Rehabilitation Site Restoration Model for Prairie Creek Mine", please note that the request for the final report and DIAND's references regarding the efficacy of the report is not applicable to the land use permit under review. However, a copy of the report may be obtained from CZN.

A report of a field inspection made by our Fort Simpson official to the site on September 7, 2000, is also attached.

I trust that this information is helpful.

Sincerely,

Ranjit Soniassy
