Subject: Spiritual power versus electrical power

As the concerned father of Stephanie Poole, who lives in Lutsel K'e, and the grandfather of her children I must express my disapproval of the plans to run transmission lines across Desnethche. This is not acceptable. The Lockhart River and surrounding area must not be disturbed. A viable alternative is available and not being seriously considered. The cultural and spiritual damage to this sacred land cannot be valued in "dollars" or increased "megawatts of power".
