Safe Spam Phish More...

Deline's Lands, Resources and Environment Department requests an extension on this comment deadline to a point after the Closure Goals Workshop that the Board is currenting trying to schedule (Formerly planned for early October, most recently slated for mid November).

LRED remains unsure about the need or purpose of such a process - the Draft Closure EA Framework doesn't make a lot of sense without understanding the Goals of the EA proceeding that it's occurring within (?or adjacent to). The gap that the framework fits within remains somewhat hazy.

Perhaps by understanding more of Imperial's initial stance/goals for their future closure plan – including their understanding of the scope of assessment, it necessarily informs the needs of what regional context is necessary to convey or 'translate'. However, at this point, it feels premature to consider regional goals without at least seeing the development's *initial* goals/outcomes (originally planned for early October).

Regards,

Todd Slack
Northern Environmental Research and Development Services
