Re MVH EA Public Hearing Locations

I write to request that the Review Board schedule an in-person hearing at Pehdzeh Ki First Nation in Wrigley.

An all-season highway would cause many changes for our community and future generations. The Review Board held MVH scoping sessions here to develop the Key Lines of Inquiry. Our members have been considering the potential all-season highway for years and have serious concerns about it.

It is very important for our community to be able to participate in the environmental assessment as much as possible. An in-person event in our community is the best way for PKFN to be able to participate meaningfully in the hearings. If the public hearings are held only in other locations, very few members would be able to attend.

We would be pleased to invite the Review Board to PKFN for this event.

Mahsi,

Chief Jamie Moses
