Mackenzie Valley Highway, Government of the Northwest Territories

RE: GNWT Extension for DAR Addendum and IRs

On April 9, 2025, the Government of the Northwest Territories (GNWT) requested a two month extension from the April 11, 2025 deadline for submitting its Developer's Assessment Report (DAR) Addendum and remaining Information Request (IR) responses. It requested this extension to allow the GNWT enough time to fully consider the proposed alternative alignment presented in the Pehdzéh Kí First Nation (PKFN) report submitted on March 4, 2025. The GNWT indicated it would continue to submit IR responses that are unrelated to the alignment as those responses are available.

The Mackenzie Valley Environmental Impact Review Board (Review Board) supports the GNWT in its effort to fully consider all information on the record. The Review Board accepts the GNWT request for a two month extension, and will soon release an updated draft workplan that reflects this extension.

The primary contact on behalf of the Review Board for the Mackenzie Valley Highway project is Senior Environmental Assessment Advisor Catherine Fairbairn (867-766-7054, cfairbairn@reviewboard.ca).
