Organization Carrying out the Public Review: Wek'èezhìi Land and Water Board

Project: Cabin Lake Project Rover Critical Minerals - Cabin Lake Project - Type A Land Use Permit Application (W2025C0005)

File(s): W2025C0005

Proponent: Rover Metals Corp.

Type of Review: Renewal Application

Item Description:

Rover Critical Minerals Corporation (the Applicant) has submitted a complete renewal application for a type A land use permit. The purpose of this Application is to continue activities associated with mineral exploration at the Cabin Lake mineral claim. The Applicant has also requested an exemption from preliminary screening because the Applicant believes that the scope of activities has decreased since it was previously permitted.

Using the Online Review System (ORS), reviewers are invited to submit comments and recommendations on the documents linked below by the review comment deadline specified. Reviewers may also wish to consider providing an overarching recommendation regarding whether the Board should approve the Application, to provide context for the comments and recommendations and assist the Board with its decision. Notices of intent to file a claim for water compensation must also be submitted by the review comment deadline. If reviewers seek clarification on the Application, they are encouraged to correspond directly with the Applicant prior to submitting comments and recommendations.

Preliminary Screening (Part 5 of the MVRMA): Board staff agree the renewal Application may be exempt from preliminary screening in accordance with the Exemption List Regulations. If you believe a preliminary screening is required, please describe your rationale, and provide comments and recommendations (e.g., on impacts and mitigation measures) to assist with the Board's preliminary screening determination. The Board's most recent [preliminary screening determination](#) for this Project is available on our public Registry.

As required under subsection 124(1), the distribution of this Item for Review also serves as notice to the Review Board.

Draft Permit: A draft Permit has been developed by Board staff, based on the previous permit and the LWBs' current [Standard Land Use Permit Conditions Template](#), to allow reviewers and the Applicant to comment on possible conditions. Where appropriate, existing conditions have been updated using the Template. These draft materials are not intended to limit in any way the scope of reviewers' comments. The Board is not bound by the contents of the draft Permit and will make its decision at the close of the proceeding on the basis of all the evidence and arguments filed by all Parties.

Following the review and response periods for the Application and the draft Permit, the public record for this proceeding will be closed, and no further evidence can be submitted except as directed by the Board.

Wildlife and Wildlife Habitat: Please be advised that comments made by reviewers regarding impacts of this Project on wildlife and wildlife habitat in this preliminary screening will inform the GNWT Minister of Environment and Climate Change's determination regarding whether a Wildlife Management and Monitoring Plan will be required for this project as per section 95 of the Wildlife Act.

All documents that have been uploaded to this review are also available on our public Registry. If you have any questions or comments about the ORS or this review, please contact Board staff identified below.
